Hi Eileen,

Great start with the build! It's looking wonderful and works really well. I have some feedback about small-ish things - nothing major. Check them out below:

- Left side: when the screen is wide (such as on computer), there is a lot of empty white space on left side, such as on the history page below "history." Same is true of competitors, awards, etc. (although not as problematic because content isn't as long).
- Locations gallery: need to finish adding content. Also, in narrower view, I think it would look better if this was centered
- Products gallery: same as locations gallery (need to finish adding content. Also, in narrower view, I think it would look better if this was centered)
- On top menu, maybe bold or underline current page that you are on to help with navigation
- In scaled down version (narrow width), I think it would be helpful to have menu at top too perhaps? Feels somewhat hard to navigate with it only at bottom
- Missing sources

Best,  
Zachary
